I have had over 40 years experience as a Local Government Officer and I joined the Council in 1999 as I felt this would enable me to make a worthwhile contribution to the activities of the Town Council. My background has been in Planning and Building Control and my particular interests lie in these fields. I am pleased that the range of services provided to the public at Quay House continue to increase to the benefit of the residents of Kingsbridge and surrounding villages. This is increasingly important as many outreach facilities that previously existed are being withdrawn to Totnes. I now look forward to a period of further achievements over a wide field by the new Council. My particular wish for the future is that further powers be delegated to the Town Council, particularly in local planning and allied issues and I remain determined to ensure that the South Hams Hospital is used to its full potential.
